

Do you have a multi-city or nationwide project?

The team at Fieldwork Network specializes in taking the complexity out of multi-city management. With over 20 years of experience in project management, we make it fun to field work. The Network provides one point of contact from bid to invoice. Fieldwork Network manages projects utilizing not just Fieldwork facilities but a host of other domestic facilities with whom we have forged highly effective partnerships over the years.

The Network can:

- Make all initial contacts including availability and provide one detailed bid for all cities
- Handle screener development and/or editing
- Provide uniform recruiting updates daily
- Manage project quotas and recruiting requirements
- Handle any and all onsite details for the day of research (food orders, directions, AV/special equipment requests, etc.)
- Provide one consolidated invoice at the conclusion of the study

Focus on the research. Let the Network do the rest!
